

Stop Plumbing Leaks with FloLogic®

Water damage due to plumbing leaks and frozen pipes is a leading cause of property claims for ministries. The damage is often made worse because ministry buildings are typically not in use every day. Last year, nearly 1,000 Brotherhood Mutual Insurance Company customers were impacted. To help protect ministries from experiencing costly water damage and disruptions, Brotherhood Mutual® recommends FloLogic, a comprehensive solution that can detect even the smallest water leak and automatically shut off the water to prevent flooding.

FloLogic: Automatic Water Shut-off Device

FloLogic is a commercial-grade intelligent leak control device. It's installed on a building's incoming water supply where it monitors for leaks 24/7. If there's a problem anywhere in your building, it automatically shuts off the water supply, helping protect your property and avoiding destructive damage.

Advantages of Installing FloLogic*

- **Detect:** Real time detection of virtually all leaks—beginning at ½-ounce per-minute, about 1 drip per second from a faucet
- **Protect:** Automatically shuts off water when leaks or critically low building temperatures are detected
- **Easy to Use:** Control the device locally or remotely through the convenient smart phone app (register app in seconds)
- **Versatile:** Multiple valve sizes available (1", 1.5", and 2"), can be installed indoors or outdoors, and interfaces with building automation and security systems
- **Premium:** USA-made, cast bronze construction with battery backup for protection during power outages
- **Proven:** FloLogic has been a leader in smart leak control since 2000, with a best-in-class 5-year warranty
